Improve the efficiency of your repairs service

About Servitor

Servitor is Civica's integrated housing repairs and maintenance management solution, designed for both client and contractor. Functionally rich and highly configurable, the application can be used to drive through efficiencies and performance improvement for responsive, planned, voids and cyclical works. Tools and alerts embedded into the system enable focus on key tasks via our innovative dashboards and workboards to provide improved service and effectively manage job progression and workload. Servitor also maintains full job costing at summary and detailed levels in order to analyse costs and profitability.

The solution is fully integrated with Civica Mobile to further increase operative productivity by automating the requesting and recording of work details while out in the field. Work can also be automatically appointed and allocated to operatives using Kirona's DRS technology and assigned jobs are sent to the operative's mobile device. Through the subcontractor portal, jobs can be received and progress updates provided, with a Servitor dashboard to monitor subcontractor performance.

Servicing requirements including gas, electrical, smoke detectors, lifts, and a wide range of other types can be managed through Servitor, including generation of appointment, reminder and action letters.

Servitor supports out of the box integration with various client systems, finance systems, asset management systems and diagnostic tools. Interfaces for eProcurement of outsourced materials with merchants including Jewson and Travis Perkins are also available. A comprehensive package of webservices are available for additional integration or to provide plug-in interfaces to online repairs functionality on external web portals.

The Servitor Express web application is a complementary product providing core functions to internal users, or for field-based officers/operatives via laptop, tablet or smartphone with browser capability.

Servitor also provides functionality for managing highways maintenance, grounds maintenance, refuse collection, street cleansing, and building cleaning along with many other ancillary functions.

Civica Housing

Working with
250
social housing
providers
