

Tranman Overview

Achieve **efficiency gains** and **mitigate risks**

An end-to-end fleet management solution delivering cost savings and operational efficiencies.

Fleet Managers need to achieve more with less. Improving the quality of services delivered and achieving efficiency targets is paramount.

Keeping control of fleet costs is a never ending challenge. Tranman, which integrates with all vehicle costs systems, can help by managing the complete vehicle lifecycle from procurement, including initial specification, through order tracking and delivery, all the way to disposal.

With its unique dashboards you can view important vehicle information at a glance; monitoring the overall status of your fleet. It will automatically generate critical date reminders highlighting areas for attention, helping you to ensure each vehicle is fit for purpose; helping you meet your duty-of-care obligations.

Delivers cost savings

Ensures compliance

Drives efficiencies

Why Civica?

- ▶ **Over 35 years' experience in delivering fleet management solutions**
- ▶ **Experience in helping customers through change**
- ▶ **Business process and operational expertise to underpin service delivery**
- ▶ **Systems and technology which enable streamlined processes**
- ▶ **Financial and operational stability backed by strong investment partner.**

Key components of Tranman

We bring together people, processes and information to help you achieve cost and utilisation benefits and a measurable ROI.

Fuel management

- ▶ Identifies inefficient vehicles
- ▶ Reduces fraud
- ▶ Reduces carbon emissions and future charges.

Accidents and drivers

- ▶ Reduces insurance premiums
- ▶ Minimises repair costs and vehicle downtime.

Optimise vehicle availability

- ▶ Reduction in overall fleet size (CAPEX and OPEX)
- ▶ Increases vehicle utilisation
- ▶ Reduces short term vehicle hire.

Compliance

- ▶ Reduces risk of prosecution and possible imprisonment
- ▶ Limits mileage expense claims.

Maintenance costs

- ▶ Optimises vehicle scheduling
- ▶ Reduces administration by implementing touchscreens and improving processes.

Tranman provides core functionality specific to your requirements, is accessible via multiple devices and integrates with other systems - helping you to streamline your processes and deliver efficient fleet management services.

Tranman core modules

- ▶ Fleet & asset administration & management
- ▶ Driver, grey fleet, risk & accident management
