

The Carelink Suite

An end-to-end **client management and rostering solution** that supports a client focused workforce to provide better care outcomes for clients.

This solution manages all aspects of the client life cycle in one integrated system, ensuring your team are in the right place, at the right time, with the right information.

"Frees our staff to complete those day-to-day administrative tasks easily and efficiently which in the long run saves us money and allows staff to provide more assistance to our participants."

Craig Bolton, IT Manager
Multitask

The Carelink software suite enables your organisation to increase efficiencies by providing access to client data and supporting case management, rostering and resource management, payroll interpretation, budget and finance tracking and integration with third-party HR, payroll and reporting systems.

The core platform, CarelinkPlus, has evolved over time to accommodate the dynamic needs of care providers, with the addition of cloud-based applications to extend the functionality of this integrated client management system.

This solution enables your organisation to focus their time and efforts on tasks that will ultimately have a greater impact on improving the level of care provided to people in our communities.

This end-to-end solution benefits your clients as they receive a reliable and individualised service, as well as your team, who are provided with a well planned roster and accurate up-to-date information to improve productivity and efficiency.

Main benefits:

- ▶ **Improved efficiency and reduced operating costs**
- ▶ **Improved employee experience through digital engagement**
- ▶ **Accurately record and report on data**
- ▶ **Security confidence with cloud ready solutions**
- ▶ **Accessibility of information with a centralised repository of data**

This solution eliminates spreadsheets and paper-based forms, removes duplication of work and supports remote workers, providing your organisation with a central repository of data that is accurate and accessible across multiple devices.

Cloud-based applications for remote workers help to accurately and securely track time and attendance and manage rosters. The ability to access information in the field, leaves more time to focus on improving care outcomes for clients.

Reduces costs

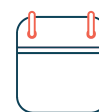

Manages compliance

Improves efficiencies

Over

500,000

hours are rostered each week in **CarelinkPlus**

The 5 products that make up the Carelink Software Suite

1. CarelinkPlus

This core product has been purpose built for the community care sector to simplify and streamline the processes that underpin community care organisations. This solution helps to reduce costs and enhance productivity to improve the quality of care provided to clients in our communities.

2. CarelinkAir

This web-based app allows the workforce involved in planning and delivering care to stay connected in the field. CarelinkAir is fully integrated with CarelinkPlus, providing access to client information, forms and rostering in real time, from any smart device.

3. CarelinkGo

CarelinkGo is a time and attendance app that connects the mobile workforce with client data and rosters, whilst working in remote areas. Employees can login, set reminders, check alerts and tasks, view documents, add notes, and start and end shifts, right from their smart phone.

4. CarelinkConnect

CarelinkConnect is the platform that hosts our suite of APIs (Application Programming Interfaces). It provides the toolset to create interfaces that seamlessly integrate CarelinkPlus with third-party systems, including accounting, finance, payroll and HR.

5. CarelinkCloud

We offer cloud hosting and managed services to help you accomplish your client management goals and business objectives. By handing over the end-to-end accountability of the software, you can focus on providing better care outcomes.

Top five reasons for choosing Carelink:

► Transforms the way you work

CarelinkPlus allows your organisation to utilise digital technology to increase efficiencies and create room for more meaningful work. This integrated system will streamline your business processes and ultimately reduce costs which can be used to increase positive care outcomes.

► Supports remote workers

Enabling employees working in remote areas to access accurate data in real-time from their corporate supplied or BYOD smart phones. Data has never been more accessible or captured more accurately.

► Digitalises paper-based processes

This solution can assist in minimising back office processing and increasing the efficiency of mobile workers in the field. Our cloud-based applications can replace paper-based forms, time sheets and capture signatures digitally.

► Seamless integration

Not only do the Carelink products seamlessly integrate with each other, but CarelinkConnect allows you to connect your Carelink solution with other third-party software, creating a more flexible and connected solution.

► Improved security

Data security is one of the top priorities for the community care sector and we are proud of the work we put into developing a secure solution. The Carelink software suite is also cloud ready which provides further security benefits.
